APPLICATION

1282-66783

Honorable James H. Welsh
Commissioner of Conservation
P.O. Box 94275
Baton Rouge, LA 70804-4275

Re: Substitute Unit Well
18100 TUSC RA SUP
Moore-Sams Field
Pointe Coupee Parish, Louisiana

Dear Commissioner Welsh:

Application is hereby made on behalf of **ENERGY PRODUCTION CORPORATION** for the calling of a public hearing, after ten (10) days legal notice, to consider evidence relative to the issuance of orders concerning the following matters pertaining to the **18,100' Tuscaloosa Sand, Reservoir A**, in the **Moore-Sams Field**, Pointe Coupee Parish, Louisiana, for which rules and regulations were established and a pattern of drilling and production units was created by Office of Conservation Order No. 1063, as amended and supplemented by the 1063-A Series of Office of Conservation Orders, to-wit:

1. To permit the applicant, Energy Production Corporation, to drill, designate and utilize its Energy Production Corporation – Constance C. Glaze, et vir No. 1 Well as the substitute unit well for the unit designated 18100 TUSC RA SUP at the location shown on the plat attached hereto, which is in compliance with the spacing provisions of the Office of Conservation Order No. 1063, effective May 1, 1979;
2. To find that a tolerance of no closer than 200 feet from the nearest unit line for the proposed substitute unit well is necessary to account for the possible variance between the proposed location and the “as drilled” location;

3. To the extent not inconsistent herewith, to continue in full force and effect all pertinent provisions of the 1063-A Series of Orders; and
4. To consider such other matters as may be pertinent to this application as shown by the evidence presented at the public hearing.

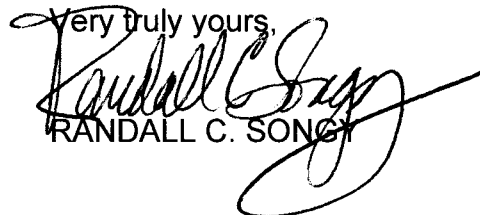

The 18,100' Tuscaloosa Sand, Reservoir A, in the Moore-Sams Field, was previously defined in Office of Conservation Order No. 1063, effective May 1, 1979, and was redefined by Office of Conservation Order No. 1063-A-3, effective January 13, 1982.

The current unit well for 18100 TUSC RA SUP, the Picard – Boudreaux No. 1 Well, is no longer producing and was plugged and abandoned January 16, 1986. The proposed substitute unit well is necessary to drain a portion of the unit which cannot be drained by any existing well in the unit. The request for the 200 foot tolerance is included as a precautionary matter in the event the final as-drilled bottomhole location is less than 660 feet from a unit line.

Pertinent data relating to the proposed application can be obtained, AT THE COST OF THE REQUESTING PARTY, by contacting Frank W. Harrison, Jr., P.O. Box 51943, Lafayette, Louisiana 70505, (337) 232-4031.

There is attached hereto and made a part hereof a plat showing the existing unit well for 18100 TUSC RA SUP, and the surface and bottomhole locations of the proposed substitute unit well, and a list of the names and addresses of the interested parties to whom this unitization proposal is being sent. Pursuant to the Revised Rules of Procedure, such list of parties is being furnished ONLY to the Commissioner of Conservation. However, the list of parties will be provided to any party requesting a copy of it. A reasonable effort was made to ascertain the names and addresses of all Interested Owners, Represented Parties and Interested Parties.

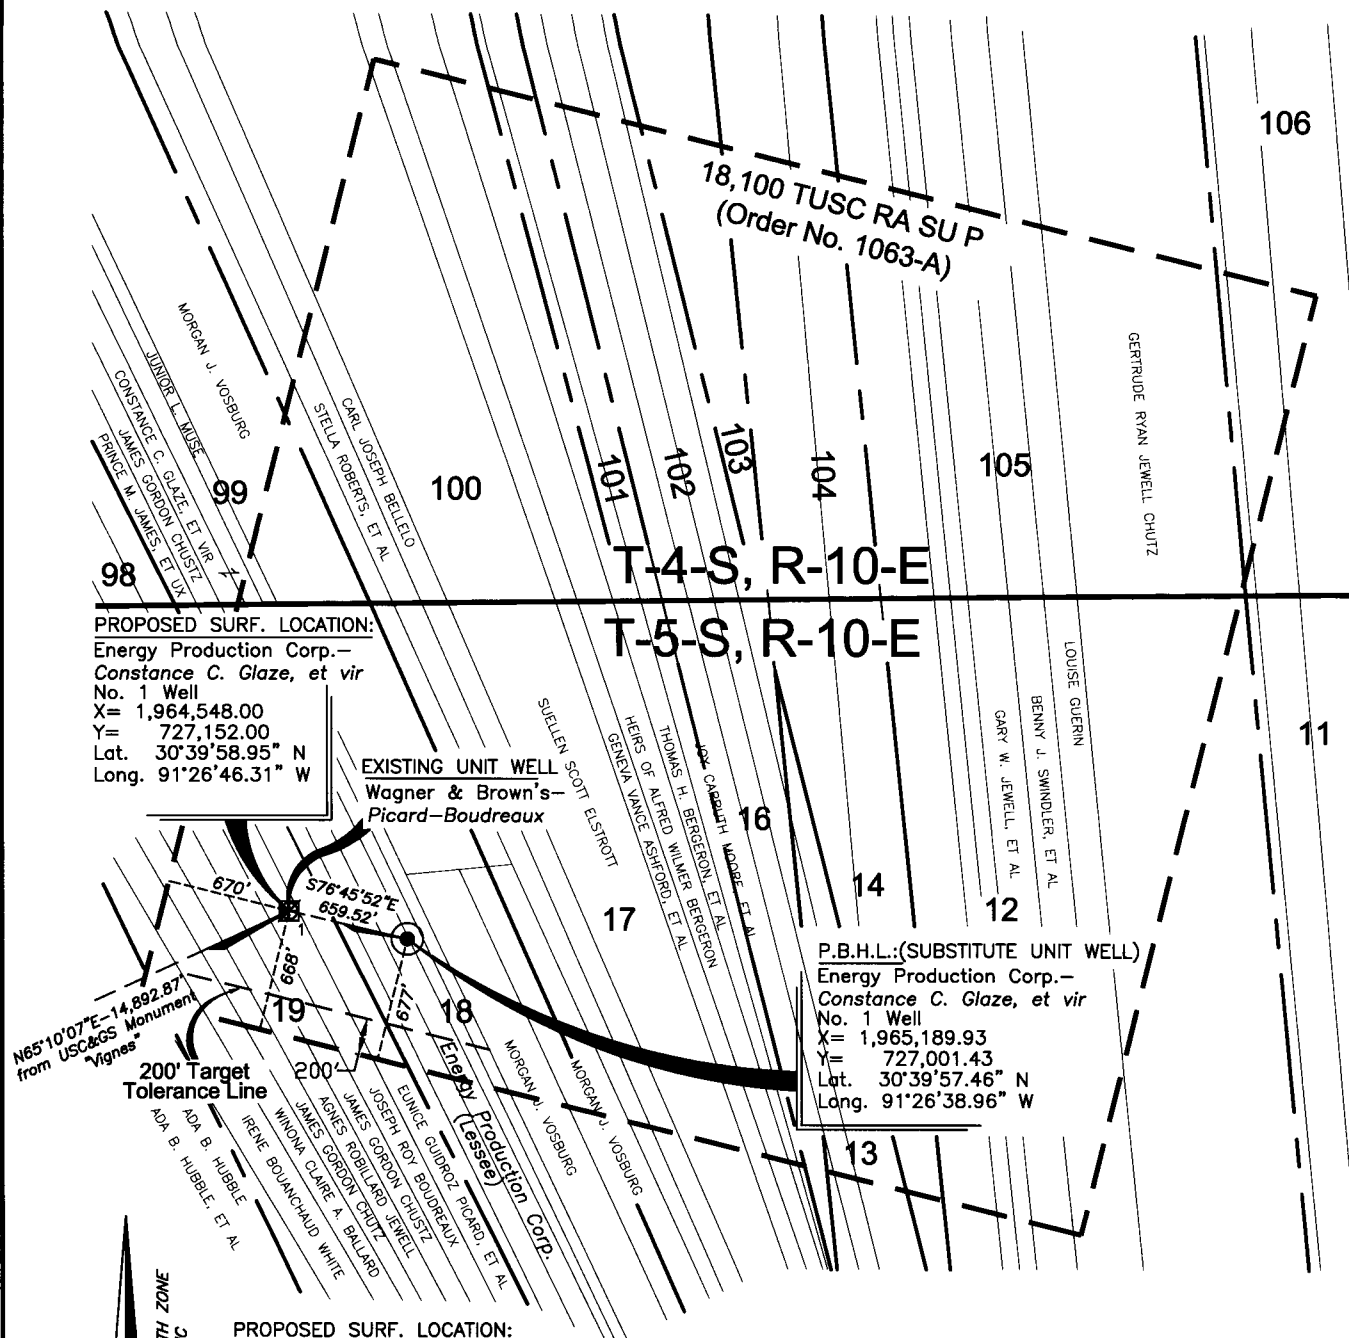

Finally, enclosed herein is our check in the amount of \$755.00 made payable to the Office of Conservation in payment of the required hearing application fee.

Very truly yours,

RANDALL C. SONGER
